

DCogAI Whitepaper

1. Introduction

DCogAI is a decentralized digital asset deployed on BNB Smart Chain. The project focuses on AI-driven data and infrastructure services, with an emphasis on transparency, utility-based participation, and responsible governance.

2. Vision

The vision of DCogAI is to establish a verifiable blockchain-based foundation that supports decentralized AI-related applications and ecosystem participation. The project prioritizes long-term sustainability and security practices.

3. Token Information

- Token Name: DCogAI
- Symbol: DCogAI
- Network: BNB Smart Chain (BEP-20)
- Contract Address: 0xA413b1cf3Db08a17E1391866538F8014630420aF

4. Governance & Security

DCogAI utilizes a proxy-based smart contract architecture and multisignature wallet governance. Critical operational controls are managed through structured approval processes to reduce single-point operational risk.

5. Roadmap

- Q1: Token deployment and liquidity initialization
- Q2: Infrastructure research and governance expansion
- Q3: Ecosystem development and community growth

6. Risk Disclosure

Participation in blockchain-based systems involves technical and market risks. DCogAI does not provide financial, investment, or legal advice. Users should conduct independent research before interacting with the token or related smart contracts.
